PROFIL

- MERN Stack Developer creating well-designed, high-performance code. I specialize in building responsive websites and apps with a mobile-first approach, ensuring seamless experiences across all devices.

Formation

- 2024 : Diploma in digital development Full Stack option in Cities of Professions and Skills (CMC).

- 2022: Baccalaureate in Physical Sciences from Babe Ahmed High School.

SKILLS

- Proficiency in frontend web languages such as HTML, CSS, JavaScript, ReactJS, and Next.js.

- Expertise in popular frameworks like Bootstrap and Tailwind CSS.

- Mastery of backend web languages including Nodejs.

- Proficiency in version control tools Git and GitHub.

- Ability to use Docker to enhance application portability, performance, and reliability.

Experience

- During my internship at the Regional Academy of Education and Training, I worked on developing a web application for task management.

- Chat application built with Next.js, Tailwind CSS, Node.js,MongoDB and Socket.io. Features include user authentication with Clerk, real-time messaging, and intuitive user interface.

- Hotel management application using Next.js, Node.js, and Tailwind CSS. It seamlessly handles reservations, guest services, user authentication, and payments via Stripe.

- Ecommerce app made with ReactJS and TailwindCss.
