SUMMARY

Full Stack Developer with +1 year of experience building web applications using MERN Stack and Next.js. I develop fast, responsive applications with a focus on performance and user experience. Skilled in designing elegant user interfaces and transforming ideas into innovative digital solutions that meet client needs and deliver outstanding results.

WORK EXPERIENCE

LinkerFolio · Self-employed   **Aug 2024 - Oct 2024**
Full Stack Developer - LinkerFolio Project

- Designed an elegant user interface that displays resumes professionally.
- Developed a system for managing social media links, making it easy for users to gather their links in one place.
- Created a QR code generation feature for easy sharing of information via mobile devices.
- Implemented automatic translation for resumes, enabling wider distribution to a broader audience.
- Integrated an in-app chat system to enhance communication between users.
- Added an option to customize the background color to match users' personal styles.

Cités des Métiers et des Compétences · Internship   **Sep 2023 - Jun 2024**
Full Stack Developer

- I gained a set of important skills in web development, where I combined theoretical knowledge with practical application in a professional environment, enhancing my technical and practical abilities.
- Learned how to build intuitive and attractive user interfaces through front-end development, as well as gained experience in back-end programming and database management.
- Developed skills in creating and maintaining dynamic web applications and applied Agile methodology in project development to enhance efficiency and teamwork.
- Improved my behavioral skills, such as communication and teamwork, making me more prepared for success in various work environments.

Académie Régionale d'Éducation et de Formation · Internship   **Mar 2024 - Apr 2024**
Full Stack MERN Developer
  Key Responsibilities:

- Analyzed and defined system requirements through use case diagrams and class diagrams.
- Developed an interactive user interface using React.js and Tailwind CSS.
- Built a robust backend with Node.js and MongoDB .
- Tested APIs with Postman and ensured system integration.
- Managed the project on GitHub and deployed it on Vercel.

PROJECTS

LinkerFolio - Your Ultimate Global Digital Portfolio & Social Hub   **Aug 2024 - Oct 2024**
- An application that allows you to showcase your resume and social media links in one professional and accessible place

QR Code Management App   **Aug 2024 - Aug 2024**
- You can create QR codes with custom logos, read QR codes from images, and scan QR codes via the camera to instantly display data. It features an attractive and responsive design.

Chat Application   **Jul 2024 - Jul 2024**
- Features user authentication with Clerk, real-time messaging with Socket.IO, and an intuitive user interface.

Hotel Management System   **May 2024 - Jun 2024**
- Enables online room booking and payment, provides an electronic ticket for confirmation, and includes a dashboard for managing reservations, payments, and customer email responses.

Personal Portfolio   **Mar 2024 - Mar 2024**
- A personal portfolio showcasing my projects, skills, and experiences in building responsive websites and applications using Next.js (React.js), Tailwind CSS, and Node.js

E-commerce App   **Dec 2022 - Jan 2023**
- Designed to empower users with a streamlined shopping experience through its intuitive interface and seamless navigation.
