

Hiring Manager / Recruitment Team

Subject: Application for Full Stack Web Developer Position

Dear Hiring Manager,

I am writing to express my interest in joining your team as a Full Stack Web Developer. With a Specialized Technician Diploma in Digital Development (Full Stack Web Option) from Cités des Métiers et des Compétences, and over two years of hands-on experience building and deploying full stack web applications, I am confident in my ability to deliver high-quality work and contribute meaningfully to any forward-thinking team.

My technical expertise spans the full development stack — from crafting performant, accessible front-end interfaces with **React.js** and **Next.js**, to designing secure, scalable back-end architectures with **Node.js**, **Express.js**, and **NestJS**. I thrive at the intersection of clean code, user experience, and system performance, always keeping maintainability and security as guiding principles.

React.js & Next.js

Node.js & NestJS

MongoDB

RESTful APIs

Socket.IO

Docker & CI/CD

JWT & RBAC

Stripe & PayPal

NOTABLE ACHIEVEMENTS

- DGT Portfolio (SaaS Platform):** Founded and built a multi-tenant Next.js SaaS for professional portfolios — featuring PayPal payments, custom domain support, multi-language, and a full admin dashboard. Live at *dgtportfolio.com*.
- Hotel Reservation System:** End-to-end booking platform with Stripe integration, e-ticket generation, email confirmations, and a secure admin panel — deployed on Vercel.
- Real-Time Chat App:** Built a WebSocket-powered chat system using Socket.IO with end-to-end encryption, JWT authentication, and live conversation management.
- E-Commerce API (NestJS):** Architected a scalable back-end with RBAC, product catalog, cart, order management, coupon system, and full Stripe payment integration.

During my internship at **Cités des Métiers et des Compétences**, I gained real-world experience working in Agile/Scrum teams, using Docker for containerization, SonarQube for code quality analysis, and Git/GitHub for version control — giving me a solid foundation in professional software development workflows.

I am actively seeking opportunities where I can take ownership of challenging features, collaborate with talented cross-functional teams, and continue growing as an engineer. I adapt quickly to new environments, communicate proactively, and am deeply passionate about building software that solves real problems and delivers genuine value to users.

I would be glad to discuss how my background and skills can add value to your organization. Please feel free to explore my portfolio at [abdellah-edaoudi.vercel.app](#) and my open-source work at [github.com/AbdellahEdaoudi](#). I am available for an interview or a technical discussion at your earliest convenience, and I look forward to the opportunity to connect.

Sincerely,

Abdellah Edaoudi

Full Stack Web Developer
