Dear Hiring Team,

I am a Full Stack Developer specializing in the MERN stack, Next.js, and NestJS, with hands-on experience building secure, scalable, and high-performance web applications. I am currently seeking opportunities where I can contribute my technical expertise and continue growing as a software engineer.

Throughout my journey, I have developed and delivered more than 23 projects, ranging from SaaS platforms and e-commerce systems to real-time applications and management tools. As the founder and developer of DGT Portfolio, I gained extensive experience across the entire software development lifecycle, including system architecture, backend development, authentication and authorization, payment integrations, and deployment.

My technical strengths include:

- Building scalable backend architectures using Node.js, Express.js, and NestJS.
- Designing and optimizing MongoDB databases and RESTful APIs.
- Implementing secure systems using JWT, RBAC, Bcrypt, and End-to-End Encryption.
- Working with modern development and deployment tools such as Docker, Git, GitHub, Vercel, and CI/CD workflows.
- Developing products with a strong focus on user experience, performance, and maintainability.

I am passionate about solving real-world problems through technology and enjoy working in collaborative environments that value innovation, quality, and continuous learning. I would welcome the opportunity to contribute my skills and enthusiasm to your team.

Thank you for your time and consideration. I look forward to discussing how I can contribute to your organization.

Best regards,

Abdellah Edaoudi
